WORK EXPERIENCE

Full Stack Developer Intern

Nov 2025 – Jan 2026

InfoTechBrains Cloud Pvt. Ltd

DP Road, Kothrud, Pune 411038

- Diagnosed and resolved **40+ production issues** by independently onboarding into a large existing codebase, performing root-cause analysis across Next.js, Prisma, and PostgreSQL layers.
- Owned end-to-end client issue resolution in a live environment, collaborating daily with CSMTech engineers and stakeholders to triage, fix, and ship solutions for production-impacting bugs.
- Extended role-based access control and scaled core system features using **Next.js, Prisma, PostgreSQL, and Turborepo**, bringing total resolved issues to **70+** on the actively deployed CSMTech.in platform.
- Improved application performance by **30%** by refactoring shared logic into reusable components and enforcing modular architecture patterns across a Turborepo monorepo.

PROJECTS

AI Growth OS – AI-Powered B2B Growth Automation Platform | [Live](#)

Jan 2026 – Mar 2026

- Architected a modular **FastAPI** backend with feature-scoped services, workers, and adapters across lead discovery, scoring, and outreach domains, enabling backward-compatible evolution of a multi-tenant SaaS platform.
- Designed an event-driven async pipeline using **Celery and Redis** to orchestrate discovery, enrichment, deduplication, and scheduled follow-ups — hardened with retries, circuit breakers, and caching for fault-tolerant execution.
- Implemented **LLM-powered** lead scoring and outreach using **OpenAI and LangChain** to classify lead quality, generate personalized multi-step email sequences, and detect reply intent for automated campaign progression.

PrepWise – AI Voice Interview Platform | [Live](#)

Aug 2024 – Oct 2024

- Built a real-time AI voice interview system using **Vapi and Gemini API**, achieving **sub-500ms** conversational latency for smooth, low-latency voice interactions.
- Developed an AI-driven analytics pipeline to process live speech transcripts and evaluate candidates across **5 key performance metrics**, delivering structured and quantitative feedback.
- Engineered a rule-driven, role-specific question generation engine producing **100% personalized** interview questions based on user experience, backed by scalable serverless architecture and secure authentication.

ACHIEVEMENTS

- Solved **500+** algorithmic challenges across LeetCode, GeeksForGeeks, Codeforces, and CodeChef.
- Finalist, Odoo × Adani University Hackathon 2026** – Cleared initial and intermediate evaluation rounds, advancing to the final stage.
- Smart India Hackathon 2024** – Led a team through the internal hackathon, successfully completing three evaluation rounds.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, SQL, Rust

Frameworks: Next.js, React.js, Node.js, Express.js, FastAPI, Hono, Tailwind CSS

Databases & Tools: PostgreSQL, MongoDB, Prisma, Redis, Git & GitHub, Postman, Cypress

DevOps & Cloud: Docker, Kubernetes, Linux, Prometheus, Grafana, AWS, CI/CD

Testing: Unit Testing, Integration Testing, End-to-End Testing

CERTIFICATIONS

DevOps & Cloud Computing – Coding Blocks: Hands-on training in CI/CD pipelines, containerization, cloud fundamentals, and production deployment workflows.

EDUCATION

GLA University

Bachelor of Technology, Computer Science

Mathura, Uttar Pradesh

Sep 2022 – May 2026

- Cumulative GPA: **7.29 / 10**
